DETAILED ACTION

Claim Objections

1. Claim 3 is objected to because --the-- should be inserted before "adapter"(line 1). Appropriate correction is required.

Election/Restrictions

2. Applicant's election of Species I in Paper No. 9 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 16 and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a. "the lapping cable"(claim 16, line 2) lacks proper antecedent basis since it was not properly earlier referred to.

b. Claims 16 and 17 are vague, indefinite, and/or awkwardly and confusingly worded since it is not readily apparent as to whether just an adapter(claim 16) or a lapping cable(claim 17) is being claimed or whether applicant is attempting to claim combinations.

Art Unit: 3724

Allowable Subject Matter

5. Claims 1-9, and 14 are allowed.

6. The following is a statement of reasons for the indication of allowable subject matter:

a. The claims are allowed because the prior art does not teach or disclose; a lapping cable device which includes a plurality of lapping cable contacts coupled to a testing device; and an adapter including a plurality of adapter contacts in electrical communication with the lapping cable contacts; wherein the adapter contacts are removably positionable in electrical communication with the wafer contacts during a lapping process.

Conclusion

7. Claims 16 and 17 have not been further treated on the merits since they are vague, indefinite, and awkwardly and confusingly worded and are therefore not fully understood.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. The prior art discloses ELG's, lapping cables, and/or adapters.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Timothy V Eley whose telephone number is 703-308-1824. The examiner can normally be reached on M-F.
